

***The Fence – by Hal Mitchell
(Build it and they won't come)***

***They came by thousands from across the border
“We'll climb the fence though we be shorter”
“We'll climb the fence of brick and mortar”
But there was no fence and there was no order.***

***The Coyotes brought drugs across the border
They used the people, though they be shorter
Who would climb the fence of brick and mortar
But there was no fence and there was no order.***

***The Governor signed a law about the border
To stop the crossers be they tall or be they shorter
Who would climb the fence of brick and mortar
Because there was no fence and there was no order.***

***Obama said “there can be no law about the border”
“We'll make it easy for the people that are shorter”
“They don't have to climb a fence of brick and mortar”
“Cause there'll be no fence and there'll be no order”***

***“If we build a fence they won't come across the border”
Brewer said “Though they be tall or they be shorter”
“We won't build a field of dreams on brick and mortar”
“We'll build our state on The Rule of Law and order.”***

***“Good fences make good neighbors” said Frost of his border.
Good advice for Arizona though our time be shorter
The people will send money instead of brick and mortar
To build a fence, SB-1070, and law and order!***
